ABOUT THE PROJECT

This website helps in finding nearby Covid-19 recovered patients who are willing to donate their plasma and blood for the plasma therapy.

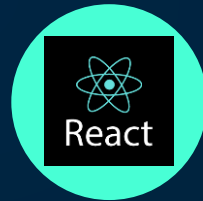

The interested users can register by providing basic details such as name, E-mail, their blood type and their address.

The patients can search the nearby donors by using the address that they are in.

The registered user are verified by using their E-mail ID and their registered password.

A page each for informative Videos and Pictures is provided to reduce the fear in the donor's mind regarding donation of blood and plasma.

TECHNOLOGIES USED

OTHERS:

Body-parser
Cors
React-icons: v4.1.0
React-image-gallery: v1.0.8
React-player: v2.7.0
React-scripts: v4.0.1
React-helmet:v6.1.0
-React Hooks
-withRouter
-Scroll event
-Mimicking
protected route

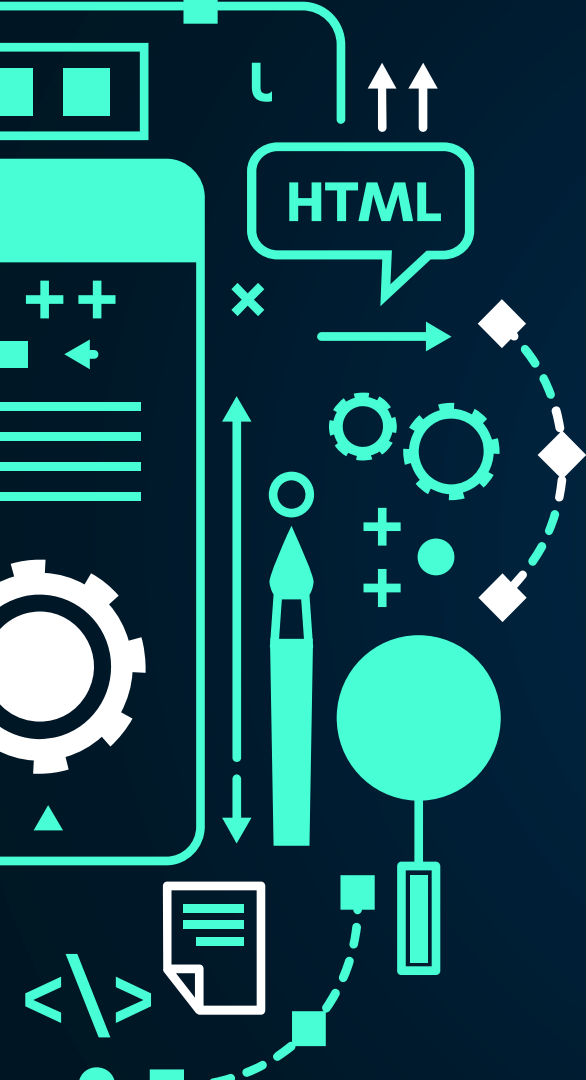

THE MEMBERS CONTRIBUTIONS

Vishwas R- App.js, Home.js, Signup.js, Auth.js, Protect.js ,
Image.js

Uthpal P - Sidebar.js, Deregister.js, Login.js, Video.js.

Tejas V & Viresh K - Contact.js and About.js and other
Styling related parts.

Exp_router.js – Vishwas & Uthpal

THANK YOU!

Please feel free to provide any Suggestions.
